EXPERIENCE

- Software Engineer Intern** | *React, Express.js, Django, PostgreSQL, Linux* May 2025 – Dec. 2025
Royal Bank of Canada (RBC) *Toronto, ON*
- Migrated legacy **Django + HTML** reporting system to **React + Express** with a new **REST API** and **role-based access control** over **155K+ records**, enabling real-time filtering for **9 reporting teams** and eliminating **3–5 weekly ad-hoc data requests**.
 - Designed normalized **SQL schema** for **KRI reporting** across **9 business units**, reducing cross-team query time from **3 minutes to 5 seconds**.
 - Automated data ingestion pipelines using **cron jobs**, eliminating **weekly outages** that previously took a full day to resolve via manual technical-team escalation.
- Software Engineer** | *Python, FastAPI, NumPy, ScrapingBee* Mar. 2025 – Present
Queen's Startup Consulting *Kingston, ON*
- Engineered a **Python web scraping API** using **ScrapingBee** to query **4 resale marketplaces** on-demand, enabling [Cache](#) users to instantly value their wardrobe without manual price research.
 - Built a **Python REST API** and **ETL pipeline** querying [2.2M transportation records](#) to surface **58K qualified trucking companies** for a Canadian investment bank, cutting manual sourcing from hours to under **30 seconds**.
- Web Development Executive** | *React, Express.js, MongoDB, Node.js, Linux* Sep. 2024 – Present
Queen's Web Development Club *Kingston, ON*
- Designed and led weekly workshops on **React, MongoDB, and Node.js** for **150+ students**, incorporating hands-on projects and SDLC methodologies including **Agile** and **Iterative** development.
 - Deployed and maintained **10+ client websites** on **Linux/Nginx** servers, achieving **zero unplanned downtime over 2 semesters** for student organizations and external stakeholders.

PROJECTS

- [Co-Habit](#) | *Spring Boot, PostgreSQL, React, Docker, GitHub Actions, AWS EC2*
- Built a full-stack **chore-management** app to track weekly chore assignments per household member across **9 database migrations**, using **Spring Boot, PostgreSQL, and Next.js/TypeScript**.
 - Integrated **Google Calendar API** via **OAuth2** with a configurable automatic sync scheduler, letting users import weekly chore assignments directly into their existing calendar and eliminating manual cross-platform event entry.
 - Wrote **305 tests** (221 backend, 84 frontend) with **JUnit/Mockito** and **Vitest/React Testing Library**, gating every **GitHub Actions** deployment on full suite success.
 - Diagnosed and resolved **6 production incidents** spanning **CORS** policy, **CI/CD** configuration, and **AWS** networking, by tracing root causes through container logs, **cURL**, and **AWS CLI**, hardening the deployment pipeline before public launch.
- [Lights Camera Auction](#) | *React, Node.js, WebSockets, Firebase, Python, Spline*
- Engineered a **WebSocket server** in **Node.js** to broadcast real-time bid and item updates to all connected clients, with **Firebase**-backed auth and bid validation enforcing fixed-increment bidding and reserve pricing.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, C/C++, SQL, HTML/CSS, Bash
Libraries & Frameworks: React, Node.js, Express.js, Spring Boot, Django, Next.js, Flask, Tailwind CSS, JUnit
Databases & Tools: PostgreSQL, MongoDB, REST APIs, OAuth2, Git, Linux, Nginx, Postman, Jira
DevOps & Cloud: Amazon Web Services (EC2, S3), Docker, GitHub Actions, CI/CD, Agile

EDUCATION

Queen's University *Kingston, ON*
Bachelor of Computing (Honours), Specialization in Software Design *Sep. 2023 – Dec. 2027*

University of California, Irvine *Irvine, CA*
Exchange Semester *Jan. 2026 – Jun. 2026*

Awards: Queen's Commitment Scholar; Killam Fellowship by Fulbright (1 of 20 Canadian students selected)
Relevant Coursework: Data Structures, System Level Programming, Operating Systems, Computer Networks
GPA: 3.55
