EXPERIENCE

- Software Engineer Intern** | *React, Express.js, Django, PostgreSQL, Linux* May 2025 – Dec. 2025
Royal Bank of Canada (RBC) *Toronto, ON*
- Migrated legacy **Django + HTML** reporting system to **React + Express**, enabling real-time client-side filtering for **9 reporting teams** and eliminating all backend round-trips on filter operations.
 - Designed **REST API** and admin interface with **role-based access control** over **155K+ records**, reducing analyst dependency on ad-hoc data team requests and SharePoint workarounds.
 - Designed normalized **SQL schema** supporting KRI reporting across **multiple business units**, reducing query complexity and improving downstream data consistency for cross-team dashboards.
 - Automated monthly data ingestion pipelines using **cron jobs**, eliminating recurring dashboard outages caused by manual triggers and ensuring on-time reporting cycles.
- Software Consultant** | *Python, FastAPI, NumPy, ScrapingBee, REST APIs* Mar. 2025 – Present
Queen's Startup Consulting *Kingston, ON*
- Engineered a **Python web scraping API** using **ScrapingBee** to query **4 resale marketplaces** on-demand, enabling [Cache](#) users to instantly value their wardrobe without manual price research.
 - Built a **Python REST API** and **ETL pipeline** querying [2.2M transportation records](#) to surface **58K qualified trucking companies** for a Canadian investment bank, cutting manual sourcing from hours to under **30 seconds**.
- Web Development Executive** | *React, Express.js, MongoDB, Node.js, Linux* Sep. 2024 – Present
Queen's Web Development Club *Kingston, ON*
- Designed and led weekly workshops on **React, MongoDB, and Node.js** for **150+ students**, incorporating hands-on projects and SDLC methodologies including **Agile** and **Iterative** development.
 - Deployed and maintained **10+ client websites** on **Linux/Nginx** servers, ensuring high availability and optimal performance for student organizations and external stakeholders.

PROJECTS

- Co-Habit** | *Spring Boot, PostgreSQL, React, Docker, GitHub Actions, AWS EC2*
- Architected full-stack chore management app with **Spring Boot** backend and **normalized PostgreSQL schema**, supporting concurrent multi-user writes and referential integrity across shared households.
 - Built **CI/CD pipeline** with **GitHub Actions** and **Docker** cutting deployment time to under **40 seconds**, with automated health checks on every push to **AWS EC2**.
- Lights Camera Auction** | *React, Node.js, WebSockets, Firebase, Python, Spline* | [GitHub](#)
- Engineered a **WebSocket server** in **Node.js** to broadcast real-time bid and item updates to all connected clients, enabling a live silent auction experience with zero page refreshes.
 - Implemented **bid validation logic** enforcing fixed-increment bidding, ownership rules, and reserve pricing, ensuring auction integrity across concurrent users.
 - Integrated **Firebase** for cloud-based item storage and secure user authentication with email verification and encrypted passwords, supporting automatic auction closing on countdown expiry.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, C/C++, SQL, HTML/CSS, Bash
Libraries & Frameworks: React, Node.js, Express.js, Spring Boot, Django, Next.js, Flask, Tailwind CSS
Databases & Tools: PostgreSQL, MongoDB, REST APIs, Git, Linux, Nginx, Postman, Jira
DevOps & Cloud: Amazon Web Services (EC2, S3), Docker, GitHub Actions, CI/CD, Agile

EDUCATION

Queen's University *Kingston, ON*
Bachelor of Computing (Honours), Specialization in Software Design *Sep. 2023 – Dec. 2027*

University of California, Irvine *Irvine, CA*
Exchange Semester *Jan. 2026 – Jun. 2026*

Awards: Queen's Commitment Scholar; Killam Fellowship by Fulbright
Relevant Coursework: Data Structures, OOP, System Level Programming, Operating Systems, Distributed Systems
GPA: 3.55
